MODI: Leadership, Governance and Performance.

cattle, heifer rearing and pregnant cow care. 'We tell people to be business-minded, not to be subsidy-oriented,' he says.

Politicians may count success by the numbers of cattle distributed or amount of loan disbursed. But dairying is a slow, accretive process. It demands a discipline many tribals are not prepared for. Jobs in Gujarat's many industrial hubs are a big attraction. But they do not reckon with the collateral damage: hazardous work conditions, precarious life in slums and the neglect of schooling.

The vocational training centre at Vaghaldhara in Valsad prepares tribal youth for industrial jobs. It was set up by a senior advocate who had made it big in Surat and wanted to give back to the community he was born into. It is love's labour. The exposed red brick building with airy rooms and cool kota stone flooring was designed by founder, Ishwer J Desai's architect daughter herself. There were 282 students when I visited. They were distributed across eight courses, some of them three-years long, others of six months duration, designed with German assistance. It was a residential co-ed facility. The students slept on bunk beds and meals — frugal — were free.

Desai responded to the government's call for partnership believing if he did not step forward, bad coins would, defeating the government's purpose because 'the current national crisis is a crisis of character.' He is right because the tribal department had previously engaged such suspicious-sounding entities as Bajrang Vyayamashala for computer education. Desai contributed land as a third of the investment; the government pitched in with the remaining Rs 5 crore, which it disbursed in less than two years, to Desai's surprise. It has a target of training 3,000 students over five years. In just two years Desai said 800 had done the drill, with nearly 90 percent success in getting jobs.
